D. ASHOK KUMAR REDDY

SENIOR FULL STACK DEVELOPER | React.js & Angular & Vue.js | .NET / C# | SQL Server

Hyderabad, India • +91 7036478214 • dasaripallyashok@gmail.com

PROFILE

Full Stack Developer with 5+ years delivering production applications for enterprise clients, with primary depth in React.js and Angular front-end engineering component architecture, state management, and performance optimization paired with hands-on experience building and consuming ASP.NET Web APIs in C# and SQL Server. Comfortable owning a feature end-to-end and collaborating across backend, design, and product inside Agile sprints. Delivered client-facing products for Dell and real-time analytics platforms for fleet operations.

CORE SKILLS

Frontend: React.js, Angular (18+), Vue.js, Quasar, Bootstrap, Redux Toolkit, Context API, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive UI

Backend: C#, ASP.NET MVC / Web API, Entity Framework, RESTful APIs, Asynchronous Programming

Data: SQL Server

Tools: Git / GitHub, Vite, Webpack, Postman, Jest, React Testing Library

AI-Assisted Development: GitHub Copilot, Claude AI, ChatGPT, Cursor AI, Codex

EXPERIENCE

Full Stack Developer — Permit Pros (Client: PermitPros)
Sep 2024 – Jun 2025

Prudent Global Tech Solutions Pvt. Ltd. · Hyderabad

- Built responsive dashboards and reusable components using React.js, Bootstrap, HTML5, and CSS3 for managing license and permit records
- Built and consumed ASP.NET MVC / Web API services in C#, using Entity Framework for data access, and wrote SQL Server queries to support permit and license business logic
- Implemented role-based access control and audit logging to meet client compliance requirements
- Integrated REST APIs and managed application state with Redux Toolkit and Context API
- Wrote unit tests with Jest and React Testing Library to cover core permit-approval and renewal workflows
- Used AI-assisted tooling (GitHub Copilot, Claude AI) to speed up development, debugging, and test coverage

Full Stack Developer — Dell Learning & Certification Portal
Jun 2025 – Apr 2026

Prudent Global Tech Solutions Pvt. Ltd. · Hyderabad

- Built responsive learning modules supporting desktop, tablet, and mobile, using React and Bootstrap to render dynamic, content-driven learning pages
- Built and consumed ASP.NET Web API services in C# to serve course content, track learning progress, and manage certification records, using Entity Framework for data access
- Designed SQL Server schemas and queries to store user progress, completion status, and certification data
- Built semantic HTML5 markup and CSS3 styling for learning module layouts, ensuring accessibility and cross-browser consistency
- Implemented progress-tracking and completion-status UI components wired to the SQL Server-backed API
- Optimized component rendering and applied lazy loading/code-splitting to reduce page load time across breakpoints
- Coordinated with content authors and backend teams to align content structures with React component requirements
- Used AI-assisted tooling (GitHub Copilot, Claude AI) to speed up development and debugging

Full Stack Developer
May 2022 – Sep 2024

Data Speaks Services Pvt. Ltd. · Hyderabad

- Developed a real-time fleet analytics dashboard using Vue.js and Quasar Framework, enabling live vehicle tracking
- Designed and built reusable Vue.js UI components used across multiple product modules
- Developed additional UI modules in Angular, including routing and component architecture
- Ensured cross-browser compatibility and mobile-first responsiveness across all applications
- Built C# / ASP.NET Web APIs and SQL Server queries to process and serve live fleet telemetry data

- Used AI-assisted tooling (GitHub Copilot, ChatGPT) for code generation, debugging, and documentation

Full Stack Developer **Mar 2021 – Apr 2022**

Capgemini · Hyderabad

- Developed frontend screens and components using JavaScript, HTML5, CSS3, and Bootstrap, connected them to REST APIs
- Contributed to backend components using C# / .NET under senior developer guidance
- Participated in Agile ceremonies and code reviews as part of a collaborative development team

SELECTED PROJECTS

Permit Pros — License & Permit Management System

Client: Dell · React.js, Redux Toolkit, Bootstrap, HTML5, CSS3, Material UI, C#, ASP.NET Web API, Entity Framework, SQL Server

- Built responsive dashboards and reusable components for managing license records, with automated expiry-notification flows
- Built RESTful Web APIs in C# / ASP.NET to support permit and license business logic, using Entity Framework for data access, backed by SQL Server data storage and reporting
- Implemented role-based access control and audit logging for permit records to meet client compliance requirements
- Optimized dashboard load times with pagination and memoized selectors, reducing perceived latency on large permit datasets
- Wrote unit tests with Jest and React Testing Library to cover core permit-approval and renewal workflows

Dell Learning & Certification Portal

Client: Dell · React.js, Bootstrap, HTML5, CSS3, TypeScript, C#, ASP.NET Web API, Entity Framework, SQL Server

- Built responsive learning modules supporting desktop, tablet, and mobile, using React and Bootstrap to render dynamic, content-driven learning pages
- Built and consumed ASP.NET Web API services in C# to serve course content, track learning progress, and manage certification records, using Entity Framework for data access
- Designed SQL Server schemas and queries to store user progress, completion status, and certification data
- Implemented progress-tracking and completion-status UI components wired to the SQL Server-backed API
- Built semantic HTML5 markup and CSS3 styling for learning module layouts, ensuring accessibility and cross-browser consistency
- Optimized component rendering to reduce page load time across desktop, tablet, and mobile breakpoints
- Coordinated with content authors and backend teams to align content structures with React component requirements

Fleet Analytics Dashboard

Client: Uttam Blas Tech Pvt. Ltd. · Vue.js, Quasar, Tailwind CSS, C#, ASP.NET Web API, SQL Server

- Independently built the frontend using Vue.js and Quasar Framework, with real-time visualizations for fleet performance metrics
- Built C# / ASP.NET Web APIs and SQL Server queries to process and serve live fleet telemetry data
- Designed live-updating charts and map-based visualizations using Quasar components to track vehicle location and status
- Implemented WebSocket-based data updates to keep telemetry visualizations in sync without manual refresh
- Styled the dashboard UI with Tailwind CSS for a consistent, responsive layout across screen sizes

EDUCATION

B.Tech, Electrical & Electronics Engineering

Avanthi Institute of Engineering and Technology, Hyderabad (2018 – 2021)
